Summary

Full Stack Engineer specialized in scalable web applications, frontend architecture, and software quality. Experienced delivering enterprise solutions in the financial and travel industries using Angular, TypeScript, Spring Boot, CI/CD, and Docker. Strong focus on performance, maintainability, automated testing, and collaboration across frontend, backend, and DevOps teams.

Education

Academia Colón	Bootcamp
Web Application Development	Madrid • Sept 2020 – Mar 2021
CCC	Vocational Training
Web Application Development	Madrid • Sept 2023 – Present

Experience

Bunker Seguridad	Madrid
Web Developer Intern	Jun 2021 - Jul 2021
• Developed the company's official website from scratch, taking ownership from design to deployment. • Gained hands-on experience in frontend development, version control, and team collaboration.	
ION Group	Madrid
Full Stack Engineer	Dec 2021 - Aug 2025
• Developed and maintained enterprise applications for the financial sector in a large-scale monorepo environment. • Built scalable and reusable frontend solutions using Angular and TypeScript. • Contributed to backend integrations and API-driven workflows. • Architected modular solutions using Nx to improve maintainability and code reuse across teams. • Participated in the full software delivery lifecycle, including testing, code reviews, CI/CD, and production support. • Delivered reliable and secure solutions aligned with the standards of business-critical banking systems. • Collaborated with cross-functional teams following agile methodologies and clean architecture principles.	
Ávoris	Remote
Software Engineer	Aug 2025 – Present
• Develop and maintain web applications for the travel industry in a collaborative team environment. • Build and enhance frontend features using Angular and TypeScript. • Contribute to testing, code reviews, and CI/CD workflows. • Support the delivery of digital solutions for multiple travel brands simultaneously. • Focus on software quality, maintainability, and performance. • Work with a strong commitment to timely delivery and cross-team collaboration.
